| Application type   | Conservation Area Notification                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| Site Address:      | 6 Cumberton Road, Tottenham, London, N17 7PA                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| Proposal           | The tree is a loquat tree. We wish to crown thin by 10% and lop off the lowest hanging branch which is 5 feet from the ground. Please see photo 2 which marks the branch in red. We'd like to remove the lowest branch as it is below standard head height which limits usage of the garden. We would like to thin for general maintenance and allow more light into the garden. The tree is located in the rear garden as identified on the sketch provided as 'tree to cut' - photo 1. |

|                  |              |                                |
|------------------|--------------|--------------------------------|
| RECOMMENDATION:  | No Objection |                                |
| Application date | 02/04/2024   |                                |
| Tree Inspector   | DM           | Date: 2 <sup>nd</sup> May 2024 |

## **Site**

The Loquat tree is situated in the rear garden of the property. It is not publicly visible.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

## **Proposal**

Tree works proposed.

The tree is a loquat tree. We wish to crown thin by 10% and lop off the lowest hanging branch which is 5 feet from the ground. Please see photo 2 which marks the branch in red. We'd like to remove the lowest branch as it is below standard head height which limits usage of the garden. We would like to thin for general maintenance and allow more light into the garden. The tree is located in the rear garden as identified on the sketch provided as 'tree to cut' - photo 1.

## **Issues**

I hold no objections to the reasonable sensitive proposed pruning works.

The specification is within standard good arboricultural practice and husbandry.

## **Recommendation**

**No Objection**
