Tree Inspector	DM	Date: rd 2024

Site

The Ash and Maple trees, as seen in the photograph and marked on the plan, are situated in the rear garden of the property. They are not publicly visible.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Alexandra Park Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed.

Ash - Crown reduce height 1.2-1.5m below most recent reduction points

Crown reduce spread back to previous (approx. 1.5m)

Maple - Crown reduce height and spread back to previous reduction points (approx. 1.8-2m height and 1.5-1.8m spread)

Maintenance works in line with good arboricultural practice.

Issues

I hold no objections to the reasonable proposed pruning works.

The specification is within standard good arboricultural practice and husbandry.

Both species generally respond well to such reduction works. The crowns of both trees will be at the same level.

Recommendation

No Objection
