| <b>Application date</b> | 15/04/2024          |                                        |
| <b>Tree Inspector</b>   | DM                  | <b>Date:</b> 16 <sup>th</sup> May 2024 |

## **Site**

The various trees, as marked on the map, are situated in the rear garden of the properties. They are not publicly visible.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Highgate Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

## **Proposal**

Tree works proposed.

Rear Garden:

G1: Laurel: Approximately 7.00m: Reduce lateral and sub lateral growth by approximately 1.50m. To control encroachment over neighbouring property. Reduce crown height by approximately 1.00m. Remove dead wood. Lightly thin crown density by 20% to increase light levels below. General maintenance.

T1: Mature Lime: Approximately 12.00m: Reduce crown by approximately 2.25m back to most recent reduction points. General maintenance.

T2: Apple: Approximately 5.00m: Reduce crown back to previous reduction points by approximately 1.00m. Reduce dead wood. Thin crown density by 20%.

T3 & T4: 2 x Small Lime Pollards: Approximately 3.00m: Left hand boundary: Trim back to previous reduction points. General maintenance.

T5: ( In No.61) Mature Lime: Approximately 9.00m: Reduce whole crown back to previous and most recent pollard points. Remove major dead wood throughout. General maintenance.

## **Issues**

I hold no objections to the reasonable, the majority of the tree works is back to most recent previous points, proposed pruning.

The above specification is within standard good arboricultural practice and husbandry.

The apple and Lime trees generally respond well to such reduction tree works.

## **Recommendation**

**No Objection**
