Site

The Mature Hornbeam tree, as seen in the photographs, and marked on the sketch plan is situated in the rear garden of the property. It is not publicly visible.

A site visit was deemed necessary to determine the appropriateness of the proposed works (20/05/2024 at approximately 10:30am).

The location is also within the Alexandra Park Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed.

Hornbeam tree in my back garden.

I am applying for a crown reduction partial as branches are encroaching on building and causing issues with roof and gutter particularly in my office. 15ft above ground level. Just this tree.

Issues

There are issues pruning the proposed scaffolds back to the main trunk. This would leave large open wounds and entry points to pathogens.

However, the applicant has agreed that rather than prune back to the main stem they will prune two forks up on both branches.

This will achieve the same affect as pulling back from the structure and be more beneficial for the tree's physiology.

Recommendation

No Objection
