Site

The various trees, as listed above, marked on the plan and seen in the photographs are situated in the front garden of the property. They are publicly visible from roadside.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Crouch End Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed.

Tree location - front garden

Rev A quote

GRP1 - Approx. H2 S1 15+DBH - 12 x Conifers that are dying

Fell to ground level

Grind stumps of above to max. depth of 100mm below ground level (subject to access)

T4 - Approx. H4 S2 35DBH Palm

Fell and apply appropriate herbicide

There is a low wall in front of the hedge and tall, established vegetation behind it, as well as other planting at either end, so it is the clients plan to re-assess what planting might be needed once the hedging has been removed.

Issues

I hold no objection to the removal of the poor conifer line of trees that have been maintained as a hedge.

The Palm has also been planted too close to the structure.

Re-assessing of the area in terms of landscaping is intended once the works have been carried out.

Recommendation

No Objection
