M	EU Stage IV	$75 \leq \text{kW} < 130$
N		$56 \leq \text{kW} < 75$
P		$37 \leq \text{kW} < 56$
Q	EU Stage V	$130 \leq \text{kW} \leq 560$
R		$56 \leq \text{kW} < 130$
EV4		$37 \leq \text{kW} < 56$
EV5	EU Stage V	$56 \leq \text{kW} < 130$
EV6		$130 \leq \text{kW} \leq 560$

Required Actions*

*Actions listed below should be completed within **5 working days** from receipt of this advisory, in order for the site to achieve compliance
In addition to the actions listed below you are expected to continue to keep the NRMM Register updated with the arrival of any new in-scope machinery.

These values estimate the differences in PM, NOx and CO2 compared with an identical Stage IIIA machine over one hour. These estimates are derived from real world emissions research studies, legal Emission Limit Values, and rated kilowatt power of the engine
