Comments: We support the application. We consider that the provision of dental services to our local area have been enhanced by the opening of Crystal Dental Care and that the sign if perfectly appropriate for the surgery. As far as we are concerned there is no negative impact on either the environment or the local area. This part of the road is already well lit up by streetlights, the bus shelter opposite and the garden centre. The addition of the dental surgery sign makes no difference to the amount of light in the road or on the houses.

We do not consider the sign causes any disturbance to local residents. In particular there are no houses opposite 143 who might be affected by seeing the sign head on.

We hope the application is granted.
