Submission: Objection

Comments: These new houses and flats will have a terrible impact on our area. They will take light from all of the houses on Annington Road. They will raise issues of privacy give that they are so close to the houses on Annington Road. They are completely out of keeping with the area which is a quiet residential area of houses with gardens not intensive housing developments like this and they will ruin the feel and history of the area. There is wholly insufficient parking provided in the application - not even one space is planned per dwelling and parking has long been a real headache for everyone living in this area - where are they supposed to go without putting more pressure on an already pressurised parking area? The traffic along Fortis Green is already busy enough, the road where this development is scheduled is very narrow. More traffic and people pulling out of small entrances onto a busy road will only add to congestion and pollution and danger. I cannot see any affordable housing units in the application - you cannot approve this given Haringey's minimum target of 40% affordable housing?

Please do not let this horrible, commercial development spoil what has been a very successful and problem free living area in Haringey
