Submission: Objection
Comments: I write to express my deep concern and shock that again Haringey council are waging war on trees on Parkland Walk.

In a bid to restore Stanhope Rd bridge, N6, and build a disabled access ramp, several trees are to be brought down within the area including a much loved and venerable oak tree.

Nobody disputes the importance of disabled access , however there are other unexplored more suitable places along the Walk, that have not been considered, that would not entail felling important trees.

BBC news

Climate change 'Adapt or Die '

By the end of the century the UK and the World will be at least 3 degrees warmer with attendant floods, drought, displacement of people, and environmental and ecological catastrophe .

Haringey understandably wants to safeguard the bridges for the future, however they cannot seem to dovetail this work into safeguarding our environment .

When London regularly reaches temperatures of 30 to 40 degrees, residents will be desperate for shade providing trees.

We have lost 75 percent of our insects, our foundation for life.

Oak trees support over 2,300 species and absorb more carbon than 500 saplings alone.

This is a unthought through application which flies in the face of Haringey's declaration of an climate and ecological emergency .
