Site

The mature Lime *Tilia* spp. trees T1-T6, as marked on the plan, are situated in the front communal grounds of the property. They are publicly visible.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location and the trees are protected by a Tree Preservation Order.

Proposal

Tree works proposed:

Works to trees protected by a TPO: T1-6: Limes: reduce to previous reduction points for maintenance.

Issues

I hold no objections to the proposed reasonable tree works. The Limes are high pollards and the specification is to prune back to the very previous last pruning cuts.

This is common practice with Lime trees, within good arboricultural practice, and Limes respond well to such works, soon reforming their crowns in a short period of time.

Recommendation

No Objection
