

Highgate Conservation Area Advisory Committee 3 July 2024

HGY/2024/1334: Queen Elizabeth House: replacement windows

Highgate Conservation Area Advisory Committee appreciates this application which takes a 'fabric first' approach however we wish to see 'as existing' drawings equivalent to the proposed dwg. no. SD 13.

We note that elements of the new windows are larger than the existing and we wish to be able to properly consider the impact on this listed building. Larger scale drawings at, say, 1:5 as existing and proposed, or larger would be helpful. Without those details HCAAC must object to this application.

If these drawings are provided by the applicant, we would be most obliged if you could let us know.
